

Gregory O. Dick, M.D., FACS; Shirley A. Olsen, M.D.

AESTHETIC PLASTIC SURGERY

Currently celebrating over 25 years in private practice, “Our practice takes care of our patients, as we would like ourselves and family members to be cared for,” says Dr. Gregory Dick. “From the moment you speak to our friendly and knowledgeable staff and enter our warm and inviting office, you will begin to realize that we consider you and every patient to be special.”

Lengthy consultations addressing all of your concerns and questions, and referrals to previous patients are just a few of many fine touches you can expect. It’s reassuring to know that Dr. Dick is a previous Chief of Surgery at Shady Grove Adventist Hospital. For added reassurance, Dr. Dick provides his home number to all postoperative patients. “We attend national meetings, and do months of research and evaluation of new procedures,” he says. “We specialize in facial rejuvenation, rhinoplasty, mommy makeovers, breast augmentation, fat grafting, laser skin care, CoolSculpting, Botox, and Juvederm fillers including Voluma, Volbella and Vollure.

Dr. Shirley Olsen, a Stanford graduate, is the practice’s laser, CoolSculpting and skincare expert. She is one of only a few physicians who directly performs all procedures. This allows her to constantly assess your treatment while performing it. A CoolSculpting provider since 2012, she has performed thousands of treatments. As a former model, she will share with you her best kept secrets for maintaining youth and beauty. “Let us help you to ‘get back the pretty,’” she says.

“Our philosophy is simple,” says Dr. Dick. “If you look good, we look good. If you are happy, we are happy.”

“From the moment you speak to our friendly and knowledgeable staff, and enter our warm and inviting office, you will begin to realize that we consider you and every patient to be special.”
